## Student Data

The Doctoral Program in Clinical Psychology at the University of North Texas is a member of the Council of University Directors of Clinical Psychology (CUDCP). Quoting from the CUDCP website: "The member programs of CUDCP support the provision of fuller disclosure about operations and outcomes of our educational endeavors" ([www.am.org/cudcp/StudentData.htm](http://www.am.org/cudcp/StudentData.htm)). Responding to the recommendation of the CUDCP Board of Directors, our Program provides the following performance and outcome data pertaining to the education of its graduate students. We are using the matrix format suggested by CUDCP so that prospective students can have consistent and interpretable information across programs.

We recognize, and hope that prospective applicants appreciate as well, that these numbers may mean very little. Such numbers do not tell all about our students. Our Program is definitely not one that screens applicants only on GRE scores, for example, in order to report high scores as indicating something about our students' qualities. We have found many excellent students who have experiences and abilities not reflected in particularly high scores. Students present various credentials and we review all applications for admission. In its applications review, we consider: (a) research experiences, (b) clinical and "people" experiences, (c) quality of undergraduate/graduate training and specificity of letters of recommendation, (d) GRE/GPA, and (e) fit of applicant's interests to program features.

What is important for an applicant is that this Program truly engages in "truth in advertising" about what it does. We provide much information about the our Program so that the student finds an appropriate fit with us or with another training program in the country.
